

Community Hiring Policy Document

Policy

This policy establishes the framework for inclusive, community-based project execution. It optimizes local talent utilization across all skill levels, ensuring that adhoc labour, research, and consulting services are sourced locally to drive economic development.

Policy Objective and Scope

The objective of this policy is to maximize socio-economic benefits within the target community. It creates accessible, transparent, and fair local employment opportunities by aligning with national frameworks.

- **Community-First Approach:** All projects will prioritize local capacity and resident labour over external contractors, where feasible.
- **Inclusive Opportunities:** Opportunities are categorized to match varying education and expertise levels (e.g., General Workers, Service Providers, Consultants).

Employment Tiers and Sourcing Strategies

Tier 1: General Labour and Adhoc Services (Supply and Delivery)

- **Target Group:** Unemployed residents, with a specific focus on youth, women, and persons with disabilities.
- **Education Requirements:** No formal tertiary education required. Basic literacy and numeracy are beneficial but not compulsory
- **Local Sourcing:** Workers will be sourced through a verified local database managed in consultation with the Ward Councillor and community structures.
- **Adhoc Supply & Delivery:** Local suppliers will be utilized for basic goods (e.g., catering, material transport). Requirements will be simplified to allow informal SMMEs to participate without prohibitive tender barriers.

Tier 2: Consulting Services

- **Target Group:** Local professionals, established community-based enterprises, and specialized subject-matter experts residing in the area.
- **Education / Experience Requirements:** Relevant tertiary degrees, professional registration (if applicable), and proven track records in their specific fields.

- **Mentorship and Sub-contracting:** If a major external consultancy must be appointed, they will be legally mandated (via project procurement contracts) to partner with, mentor, and sub-contract local professionals.

Tier 3: Research Services

- **Target Group:** Local students, graduates, or individuals with basic data-capturing skills
- **Education / Experience Requirements:** Grade 12 (Matric) minimum, with preference given to individuals currently pursuing or holding tertiary qualifications.
- **Training and Capacity Building:** The project management team will provide on-the-job training in research methodologies, interview techniques, and data ethics
- **Task Allocation:** Tasks will be divided into micro-projects (e.g., localized door-to-door interviewing) to distribute work and income among multiple local researchers.

To prevent patronage and ensure fairness, the selection of all local labour and service providers will adhere to widely advertising and using accessible community platforms, the use of official Community SMME and Labour Databases will be used to ensure equitable rotation of work opportunities. Lastly a neutral Oversight or Project Steering Committee (PSC) will be established to monitor the recruitment process and verify the residency and unemployment status of local workers.
